2023 – Lab 06

Following Android Official Tutorials

In this practical, your ability to try the code labs given in the official documentation will be tested. Instructors will not guide you during this session. The expectation is that after 8 weeks into the module you should be able to try out online resources on your own.

Follow the guide given below

https://developer.android.com/codelabs/android-training-drawables-styles-and-themes

- Try the steps alone.
- Don't talk with your friends about the implementation during the lab.
- At the end of the lab, do a self-evaluation on where you are at after 8 week in to the module.
- Submit your work to the GitHub classroom given below
- **Do not open the link before you start the lab**
- You must submit your work by pushing your local repository to GitHub
- Your submission will be considered as attendance to the session
